SK6000X-BF6

Automatic 6 Spindle Capper w/ Cap Alignment Cylinder

Heavy Duty

With NEW
CAP CORRECTION
Technology!

Pictured with optional conveyor

The SK6000X-BF6 is a fully automatic, inline, six spindle capper featuring an innovative belt feed system that eliminates vibratory bowls, overhead hopper loading and time consuming changeovers on a range of flat caps.

Easily accommodates most 400, 410 and CRC caps at remarkably high speeds for an inline unit.

- Cap Alignment Cylinder
- Floor Level Loading
- Easy Changeover
- Heavy Duty Drive System
- High Speed Operation
- Non Vibratory Feeder
- 5 Cubic Ft. Stainless Steel Hopper
- Handles 400, 410 and CRC Caps
- Heavy Duty Stainless Steel Frame
