SKF 1000 Piston Filler

The SureKap piston-filling machine is used for multiple applications. The model is extremely versatile and fills many free flowing liquid products.

Features include:

- Accuracy +/- 0.5%
- Stainless Steel frame
- Explosion-proof construction
- Stainless Steel adjustable rail set included
- Portable, can be set up on any flat surface
- All Stainless Steel liquid and air pipe fittings
- Electrical Requirements: There are no electrical requirements for the filler. The filler is completely controlled by air.
- 4 oz. to 32 oz. Adjustable Stainless Steel Cylinder
- All pneumatic operation
- Adjustable nozzle assembly
- Foot switch operated
- Stainless Steel 1/2" npt check valve
- Air Requirements: Approximately 2 CFMs @ 100 psi

RECOMMENDED FOR: Water thin to viscous, non-foaming products. Can also handle foamy products with optional foam reducing nozzles. Standard 32 oz piston fills from 6 oz to 32 oz containers.

Options: Fully Automatic, Additional filling cylinders and nozzles, Conveyor.
