SKF 6000 Flowmeter Volumetric Liquid Filler

Designed for multiple applications and high speed, our SKF6000 is a fully-automatic, volumetric liquid filler with a mounted PLC keypad for quick and easy adjustments and includes casters on a heavy duty stainless steel frame.

Features include:

- Handles water-thin to high viscosity liquids
- Fills 1 oz. to gallons
- Stainless Steel air operated nozzles
- Stainless Steel 1/4" npt flowmeters
- PLC controlled with lighted keypad entry
- 35 GPM pneumatic pump
- 20-gallon capacity stainless steel pressure tank
- On casters for complete portability
- Heavy-duty stainless steel frame
- Fully Automatic
- Air Requirements: Approximately 4-5 CFMs @ 100 psi
- Electrical Requirements: 115V/60 hz/1 phase; 4 amps

RECOMMENDED FOR: Water thin to viscous, non-foaming products. Can also handle foamy products with optional no foam nozzles.

Options: Drip Tray, NEMA 4 washdown, Conveyors, etc
